## **YourCash signs new contract with Symstream to provide innovative connectivity solutions for their UK ATM estate**

*15 February 2012*

Melbourne, Australia – Symstream PTY has been awarded a 3 year contract by YourCash Ltd a leading independent European ATM Deployer to provide an innovative managed connectivity service enabling remotely deployed ATMs to connect to the LINK network primarily using the GSM (Global Standard for Mobile Communications) voice channel but with the capability to extend to 3G and 4G.

Symstream's unique patented technology will provide YourCash with greater, more resilient coverage, enhanced security (PCI Compliant), reduced costs and most importantly, increased ATM availability.

The solution will provide YourCash with real-time status and diagnostic information and the ability to remotely configure & update routers. YourCash intend to use to the Symstream solution on all future ATM deployments, where a fixed line connection is not required.

Ewan Ogilvie, Director of Sales & Service at YourCash, commented, "I am delighted to be working with Symstream. I found their 'can do' attitude and the lengths they were prepared to go to prove their product, a refreshing change. I strongly believe their solution is on the leading edge of the industry and will offer flexible connectivity, via the major Telco's ensuring an improved ATM service to our customers.

John Zanetti, Regional Manager Europe at Symstream commented, "The team at YourCash have been tremendous in their adoption of a new and innovative wireless solution. Our focus was to help YourCash meet new market demands by dramatically increasing their ATM's communication uptime, reliability and profitability. The YourCash partnership is an important step for our growth in the region and we look forward to contributing to their on-going success."

### **About YourCash**

YourCash deploys c. 7,000 ATMs throughout the UK, Netherlands and Belgium. The ATMs are located in convenience stores, universities, casinos, hospitals, military barracks, post offices, leisure outlets and petrol forecourts. 34% of the YourCash UK estate is now Free-to-Use and accounts for 75% of our overall transactions handled in the UK.

In 2011, the overall business handled 70 million ATM transactions equating to £2 billion cash dispensed through the UK estate and €1 billion in the Netherlands.

YourCash has plans to expand its international proposition across Europe including the introduction of high speed ATM terminals, wireless technology and branding licences to offer our business partners a unique ATM service proposition for their customers. In September 2011, YourCash successfully launched their merchant fill ATM proposition in Belgium, after agreeing deals with 4 major Belgian supermarket chains.

### **About Symstream**

The Symstream Group is a premier technology company focused on delivering innovative wireless solutions and real-time management to the Banking (ATM, EFTPOS), Utility (Smart Metering) sectors and other M2M applications.

Based on patented, proprietary technology, the unique Symstream protocol allows wireless data to use the voice channel for time critical applications, thus giving the data higher priority than in any other packet switched network. The unique Symstream solution provides a network management system for controlling all the elements such as remote operation and performance monitoring, over the air configuration and programming, statistical analysis and reporting of remote site service availability, alarms, data traffic volumes and usage patterns. The company has developed this technology from original concept through to finished product.

Symstream is global in reach with sales offices throughout Asia Pacific and India as well as the United States, France and UK. The Symstream technology is currently being deployed in these regions and the company is rapidly developing a reputation for delivering innovative, world class, mature technologies and solutions.
